Getting Started with Collective Impact

Is Collective Impact Right for You?

Webinar 1 of 3
Welcome to “Is Collective Impact the Right Approach for You?” the first webinar in a three-part series on “Getting Started with Collective Impact.”

This series is designed to help you learn more about starting a collective impact initiative and how to get your initiative off on the right foot. You’ll hear from consultants from FSG who have helped implement dozens of initiatives as well as partner practitioners who are working “on the ground” in these initiatives.

In this webinar, we’ll focus on:

1. The foundations of the collective impact approach
2. How to identify the pre-conditions that enable collective impact efforts to succeed
3. How to determine whether collective impact is appropriate for your issue and local context

In the following pages, you’ll find tools and worksheets to help you through this part of the journey.

For additional resources, please visit the Collective Impact Forum at http://www.collectiveimpactforum.org.
2. Glossary of Terms

**Collective Impact** – Collective impact is the commitment of a group of important actors from different sectors to a common agenda for solving a specific social problem at scale.

The Five Elements of Collective Impact:

**Common Agenda** – All participants share a vision for change that includes a common understanding of the problem and a joint approach to solving the problem through agreed-upon actions

**Shared Measurement** – All participants agree on how to measure and report on progress, with a short list of common indicators identified and used to drive learning and improvement

**Mutually Reinforcing Activities** – A diverse set of stakeholders, typically across sectors, coordinate a set of differentiated activities through a mutually reinforcing plan of action

**Continuous Communication** – All players engage in frequent and structured open communication to build trust, assure mutual objectives, and create common motivation

**Backbone Infrastructure** – An independent, dedicated staff (with funding!) guides the initiative’s vision and strategy, supports aligned activities, establishes shared measurement practices, builds public will, advances policy, and mobilizes resources
3. Feasibility Framework

Download the **Collective Impact Feasibility Framework** from the Collective Impact Forum for the framework and full instructions.
4. Systems

Collective impact is most appropriate if the system that the problem resides in is broken.

How can you tell if the system is broken?

Some key warning signs include:

1. **Silos**
   - Actors in the system are not working together to address the problem (i.e., not coordinated)
   - Beneficiaries face huge gaps in the system that exacerbate the problem
   - Resources are duplicated across the system without much result

2. **Outdated Policies**
   - Current policies either contribute to the problem or impose significant barriers to potential solutions

3. **Little Innovation**
   - Current solutions do not address the true nature of the problem
   - System actors are not empowered to take risks when designing solutions
   - Evaluation and learning are not prioritized
4. Inequity
   - Disparate community outcomes for marginalized groups
   - Limited power sharing across key stakeholders in the community (i.e., key decisions are made without considering multiple perspectives)
   - Lack of engagement of those with lived experience in designing and implementing solutions

5. Lack of Scale
   - Solutions have limited reach (i.e. small percentage of the population has access)
   - There are barriers to scaling successful solutions in the local landscape (e.g., resource limitations, lack of capacity, etc.)
5. Prerequisites

Launching a collective impact initiative has four prerequisites:

1. Urgency
   - A critical problem in the community
   - Frustration with existing approaches
   - Multiple actors calling for change
   - Engaged funders and policy makers

2. History of Trust
   - Existing partnerships and collaboratives in the community
   - Growing level of trust amongst key stakeholders

3. Local Champion
   - Commands respect and engages cross-sector leaders
   - Focused on solving problem but allows participants to figure out answers for themselves

4. Resources for Collaboration
   - Committed funding partners, including local funders
   - Sustained funding for at least 2-3 years to support the process of collective impact
   - Resources dedicated to collaboration infrastructure (i.e., backbone, data)
6. Other Collaboration Tools

Collective impact is one of several effective collaboration tools.

1. Joint Project
   - Short-term, one-time collaborative effort among a small set of partners, often to develop or pilot an innovative product or approach

2. Joint Program
   - Collaboration among small set of partners to implement a program to address a specific aspect of a social problem

3. Strategic Alliance
   - Platform for ongoing collaboration around one or more related social issues, aligning partners (typically >5) in support of a common agenda and joint investments

4. Collective Impact
   - Collective impact is the commitment of a group of important actors from different sectors to a common agenda for solving a specific social problem at scale.
7. Our Initiative

Individually or with members of your group, fill out the following form:

1. What is the problem we are facing?

2. Does the problem require actors from across sectors to work together to solve it?

3. Is the problem we are trying to address of adequate scale to invest in a collective impact approach?

4. Is our system broken? (See pages 5-6)
   a. What silos are we seeing?
b. Are there outdated policies affecting our problem?

c. What innovation challenges are there?

d. What equity challenges are there?

5. Are our prerequisites in place? *(See page 7)*

a. What tells us there is urgency around this problem?

b. Do we have trust across our cross-sector organizations?
c. Do we have a local champion who can engage leaders?

**Collective Impact**

*Article*

This is the original FSG article describing collective impact, published in the Winter 2011 *Stanford Social Innovation Review*. The article highlights how large-scale social change requires broad cross-sector coordination, and explains how substantially greater progress could be made in alleviating many of our most serious and complex social and environmental problems if nonprofits, governments, businesses, and the public were brought together around a common agenda to create collective impact.

Through this collective journey, exciting new solutions to complex problems emerge.
